

MEN WITH THE MARK

We're the luminous children of the dark
We're easy to find like fireflies
It's the reason why
We've become men with the mark

Our visiting hours are still late at night
And we only speak in our sleep
Our mother tongue is "Secret"
Like the sick, we'll bring relief but sometimes

We're afraid
You might stay
And never go away
So make haste
And sing your nursery rhyme
Your song
Is safe with us

We'll get older but somehow remain
The luminous children of the dark
Nightmares still identify us by the mark
You've left, but nothing's changed

Every thought we think, every word we say
Every hole we fuck is controlled by your lie
We were told at night
That we'll heal someday

MEN WITH THE MARK

We're afraid
You might stay
And never go away
So make haste
And sing your nursery rhyme
Your song
Is safe with us

Our visiting hours are still late at night
And we only speak in our sleep
Our mother tongue is "Secret"
Like the sick, we'll bring relief as we realise

We remain the luminous children of the dark
We're easy to find like fireflies
It's the reason why
We've become men with the mark
